1/3 answered

Write a C program that takes an array as input and returns it reversed.

Your Code

```

1 #include <stdio.h>
2
3 void reverseArray(int a[], int n) {
4     int i, temp;
5     for (i = 0; i < n / 2; i++) {
6         temp = a[i];
7         a[i] = a[n - 1 - i];
8         a[n - 1 - i] = temp;
9     }
10 }
11
12 int main() {
13     int n, i;
14     scanf("%d", &n);
15
16     int a[n];
17     for (i = 0; i < n; i++) {
18         scanf("%d", &a[i]);
19     }
20
21     reverseArray(a, n);
22
23     for (i = 0; i < n; i++) {
24         printf("%d", a[i]);
25         if (i < n - 1) printf(" ");
26     }
27 }

```

Input

5
1 2 3 4 5

Output

5 4 3 2 1

Write a C program for palindrom.

Your Code

```
1 #include <stdio.h>
2 #include <string.h>
3
4 int main() {
5     char s[200];
6     int i, j, isPal = 1;
7
8     if (scanf("%199s", s) != 1) return 0;
9
10    i = 0;
11    j = (int)strlen(s) - 1;
12
13    while (i < j) {
14        if (s[i] != s[j]) {
15            isPal = 0;
16            break;
17        }
18        i++;
19        j--;
20    }
21
22    if (isPal)
23        printf("Palindrome\n");
```

Input

madam

Output

Palindrome

Your Code

```

1 #include <stdio.h>
2
3 int binarySearch(int arr[], int n, int key) {
4     int low = 0, high = n - 1;
5
6     while (low <= high) {
7         int mid = low + (high - low) / 2;
8
9         if (arr[mid] == key)
10             return mid;
11         else if (arr[mid] < key)
12             low = mid + 1;
13         else
14             high = mid - 1;
15     }
16     return -1;
17 }
18
19 int main() {
20     int n, key;
21
22     printf("Enter number of elements: ");
23     scanf("%d", &n);
24
25     int arr[n];
26     printf("Enter sorted elements: ");
27     for (int i = 0; i < n; i++) {
28         scanf("%d", &arr[i]);

```

Input

```

5
1 3 7 9 12
9

```

Output

```

Enter number of elements: Enter
sorted elements: Enter element to
search: Element 9 found at index 3

```
